Hydrobiologia

The International Journal on Limnology and Marine Sciences

Volume 461, 1 October 2001

Special Issue
Microbial Aquatic Symbioses:
from Phylogeny to Biotechnology

Guest Editor
J. Douglas McKenzie

Preface vii–viii

Photosymbiotic associations in planktonic foraminifera and radiolaria
Rebecca J. Gast, David A. Caron 1–7

Carrier of reduced sulfur is a possible role for thiotaurine in symbiotic species from hydrothermal vents with thiotrophic symbionts
A.M. Pruski, R. De Wit, A. Fiala-Médioni 9–13

Vertical transmission of cyanobacterial symbionts in the marine sponge *Chondrilla australiensis* (Demospongiae)
Kayley M. Usher, John Kuo, Jane Fromont, David C. Sutton 15–23

Ammonium metabolism in the symbiotic sea anemone *Anemonia viridis*
J. M. Roberts, L. M. Fixter, P. S. Davies 25–35

The symbiotic role of marine microbes on living surfaces
Evelyn Armstrong, Liming Yan, Kenneth G. Boyd, Phillip C. Wright, J. Grant Burgess 37–40

Microbial symbionts of the Australian Great Barrier Reef sponge, *Candidaspongia flabellata*
Adam M. Burja, Russell T. Hill 41–47

Symbiosis research at the end of the millenium
D. C. Smith 49–54

Sponge–microbe associations and their importance for sponge bioprocess engineering
Ronald Osinga, Evelyn Armstrong, J. Grant Burgess, Friederike Hoffmann, Joachim Reitner, Gabriela Schumann-Kindel 55–62

Inhibition of algal photosynthesis by a symbiotic coral
A.J. Grant, M. Rémond, K.J.T. Withers, R. Hinde 63–69

Are free amino acids responsible for the 'host factor' effects on symbiotic zooxanthellae in extracts of host tissue?
Clayton B. Cook, Simon K. Davy 71–78

Symbiotic dinoflagellates in marine Cnidaria: diversity and function
M. S. Goodson, L. F. Whitehead, A. E. Douglas 79–82
